WHERE TOMORROW'S VICTORIES BEGIN

# PROPONENT INITIATIVES AFFECTING TASS

- USAAVNC now involves ARNG in the development of plans and decision making.
- ARNG participates in critical task selection boards.
- New staffing procedures for all Avn Branch POIs are being implemented. Staffing will include all Training Institutions.

# PROPONENT SCHOOL ISSUES AFFECTING TASS

- NGB's non-concurrence without detailed comments really slows down the process.
- POIs are sent to NGB for review after completion. If there is a problem, it is identified after completion rather than during the design.
- Occasionally POIs are not being forwarded to the TASS Battalions for SME input.
- Title XI soldiers have no venue to address sensitive Proponent level issues.

# TASS-RELATED INSTALLATION SUPPORT CHALLENGES

- System Approach to Training (SAT) process is not being followed at USAAVNC/USAALS.
  - Haphazard process for POI changes.
  - No central ownership of all Avn POIs.
- ASAT design does not currently allow for POI production. New release anticipated 1APR to fix this problem.
- TADSS resources are usually not adequate when expanding additional training locations.
- Legacy systems continue to receive low priority.
